Re: Acceptance of Notice of Intention to Commence Small Mining Operations, Cambrillic Natural Stone, L.C., Cambrillic Mine, S/027/079, Millard County, Utah

Dear Mr. Teseneer:

On May 19, 1999, the Division received a Notice of Intention to Commence Small Mining Operations from Cambrillic Natural Stone, L.C. The proposed Cambrillic Mine is located in the SE1/4 of the SW1/4 of Section 14, T17S, R13W, Millard County, Utah. A copy of this notice is forwarded to you for your information, as this project is located on BLM managed lands and you would be the designated lead agency.

The Division has evaluated this Notice under the Small Mining Operation section of our Rules. The information provided in the notice meets the requirements of Rule R647-3 of the 1988 Division of Oil, Gas and Mining Minerals Rules, and Title 40-8, et seq., of the Utah Mined Land Reclamation Act of 1975. No additional information is required from the operator by the Division at this time. By accepting this application, the Division expects the operator to conduct his mining activities in compliance with the Operation and Reclamation Practices of Rule R647-3-107, 108, and 109 as outlined on pages 3 and 4 of the notice, as no variances from these standards was requested. The operator paid the Division initial \$100.00 permit application fee for this project.

Approval of mineral exploration or mining operations by the Division of Oil, Gas and Mining **does not constitute approval to commence operations** upon federal lands managed by the Bureau of Land Management (BLM) or United States Forest Service (USFS). Before conducting mining operations on these lands, the operator must provide written notification (enclosed), meet bonding requirements, and obtain written approval from the appropriate agency.
